

Hybrid Care at Scale: The Future of Telehealth

Establishing telehealth as a permanent modality in inpatient care delivery

Introducing Inpatient Virtual Engagement

The industry's first subscription-based solution for hospital-based hybrid care at scale – every room, every bed, every patient. The four tenets of IVE:

1

Purpose-Built Devices

Secure, medical-grade telehealth Access Point-of-Care Systems for all patient acuties

3

Telehealth Administration Portal

Centralized administration to manage operations for all telehealth programs

2

APS Fleet Management

Cloud-based fleet management to govern telehealth devices quickly and easily

4

Solution-as-a-Service

Subscription model to reduce capital investment through pay-as-you-go fees

By enabling inpatient hybrid care at scale, health systems can bring virtual resources into broader use cases to improve operations as well as the patient and clinician experience.

Clinical Value

- + Enhances clinical collaboration
- + Improves patient safety and coverage
- + Accelerates the speed of intervention

Return on Value

- + Mitigates staffing challenges by enabling virtual clinical workflows
- + Improves patient safety and coverage to accelerate the speed of intervention
- + Cornerstone of “Hospital Room of the Future” initiatives

High Acuity: One-to-Few Bedsides

- + Tele-ICU programs — cardiac, sepsis, COVID
- + Direct Interaction with other high-risk patients

Medium Acuity: One-to-Many Bedsides

- + Tele-sitting — fall risks, self-harm, behavioral
- + Virtul specialist visits — post-op, COVID

Lower Acuity: One-to-Every Bedsides

- + Interactive telehealth engagement for all other inpatient use cases
- + Enabled by the new APS 100, a cost-effective telehealth device for virtual engagement at every patient bedside

Virtual Nursing Support

Enterprise telehealth solutions like IVE create the foundation needed to enable virtual nursing. Telenursing workflows partner experienced remote nurses with bedside staff to expand the reach of virtual care programs and limited RN resources.

Clinical Value

- + Reduced burnout by taking work off of floor staff
- + Career extension opportunities for staff retention
- + Remote training and coaching for new nurses

Return on Value

- + Admissions
- + Discharges
- + Rapid Response
- + Tele-Monitoring
- + Tele-Mentoring
- + Tele-Rounding

Caregility Cloud™ Virtual Care Platform

Build your virtual care program on our flexible, Best-In-KLAS Caregility Cloud™ platform to maximize resources, streamline workflows, and enrich patient care across your enterprise.

Caregility is dedicated to connecting patients and clinicians everywhere.
